(54) GAS PRESSURE ADJUSTING SYSTEM

(57)Abstract:

PURPOSE: To stably ensure a predetermined gas supply pressure just before a combustion device.

CONSTITUTION: There are provided a governor 32 as gas pressure fine adjustment means and a pressure sensor 31 as gas pressure detector means on a line connecting between a gas meter 3 and a combustion device 7 and the governor is feedback-controlled by a detected value by the pressure sensor 31 to supply gas of optimum pressure to the combustion device 7.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against examiner's
decision of rejection]
